

AccuPoint® Advanced Next Generation

A Complete Hygiene Monitoring System

Make the Invisible Visible

Explore Our Upgraded System:

- Fast, actionable results combined with customisable data manager software for the most prescriptive hygiene monitoring plan possible
- RFID ready to simplify the testing process
- Touch screen instrument makes navigating to areas and sites fast and easy
- A range of connectivity options to suit your needs
- Easy to hold, robust, rubberised edges for protection on-site

Take all of this and pair with our samplers, including our unrivaled, flat surface sampler, liquids and access samplers, and you have a complete hygiene monitoring system!

Benefits Include:

- Multiple routine testing plans possible
- Track and trend for data results over time
- Better ATP recovery than other systems available*

AOAC Approved:

Our hygiene monitoring system was the first to receive full AOAC validation as an effective method to determine the presence of ATP on stainless steel in food processing and food service facilities. AccuPoint Advanced NG benefits from the same validation.

Item No. 9904A

**According to an independent comparison of ATP hygiene monitoring systems*
