

**KEEP OUT OF REACH OF CHILDREN
FOR EXTERNAL USE ONLY**

Indications: For use in cattle, horses and swine as a topical antiseptic prior to surgical procedures such as castrating and tail docking; for application to the umbilical stump (navel) of newborn animals; and for minor cuts, teat sores, bruises and abrasions.

Directions For Use: Hold container approximately 4 to 6 inches from the area to be sprayed. Point valve at the area to be sprayed. Pull trigger of valve and spray area once lightly. May be repeated daily, if necessary, until the area is healed. Apply to the umbilical stump of newborns 2-3 times per day until stump has dried.

When using prior to surgical procedures, allow 10 minutes contact time.

Note: When used on or near the teats or udders of dairy animals, the teats and udders should be thoroughly washed before the next milking or nursing young to prevent contamination of milk.

Caution: If redness, irritation or swelling persists or increases, discontinue use and consult a veterinarian. Not for use on burns, in body cavities or in deep wounds.
