

Prozap® Fly-Die Ultra™ Equine Spray

Product Numbers: 1887530

Prozap Fly-Die Ultra Equine Spray	Product Number
1 quart bottle	1887530

Purpose

Prozap®'s Fly-Die Ultra™ has been uniquely formulated to not only combat flies, mosquitoes, gnats, ticks, and lice but to also provide extended protection during heavy workouts and rain.

Product Description

Fly-Die Ultra is water based and provides control on horses and foals by binding to the hair shaft providing up to 14 days of protection. Effectively repels and kills stable flies, horn flies, house flies, horse flies, deer flies, face flies, gnats, ticks, lice, and mosquitoes, including those that may transmit West Nile Virus. Apply 1 to 2 oz per animal daily. Can be applied by either a soft cloth or a fine mist spray.

Use to Spray On: Fly-Die Ultra may be applied as a fine mist spray to the flanks, face, legs, topline, and other areas where flies congregate. Do not wet horses skin or exceed two ounces per application. After application, brush out thoroughly to bring out a bright sheen on the coat. Repeat daily as needed.

Use to Wipe On: First brush animal to remove excess dirt and dust. Moisten (but do not wet to the point of dripping) a soft cloth and rub over the hair. It is best to apply by rubbing against the hair growth. Apply to common areas where flies will gather: legs, shoulders, shanks, neck, and facial areas. Only a light application is required. After application, brush out thoroughly to bring out a bright sheen on the coat. Repeat daily as needed.
