

Rodenticide Bait

RESTRICTED USE PESTICIDE

Prozap[®] Zinc Phosphide Pellets

Product Number: 0283390, 0077140, 0077240, 0283490

Key Features

- Controls voles, rats and mice, prairie dogs, pocket gophers, kangaroo rats, and Columbian and Richardson's ground squirrels
- Prozap[®] pellets may be used in field applications
- Pellets utilize a special hardening agent
- Contains an attractive protein concentration of 19 - 24%
- Contains less dust than competitor formulations
- Can withstand 1.5" rainfall before dissolving
- Easily filters through vegetation
- Has exclusive label uses
- The 1/8" small pellet size is preferred by voles and mice

Product Description

Zinc phosphide, a powerful acute rodenticide, is contained in all Prozap rodent bait formulations. The fast-acting baits are formulated with a special blend of processed grains that are especially appealing to rodents.

Treatment and Use

Use Prozap pellets for spot treatments in and around buildings, orchards and groves, vineyards, rangeland and non-crop areas such as lawns, ornamentals, golf courses, parks and nurseries.

Prozap Zinc Phosphide Pellets are labeled for use for either above and/or below ground applications in a wide spectrum of sites including:

- Grape vineyards
- Macadamia nut orchards
- Nursery stock (ornamental and non-bearing fruit trees)
- Orchards and groves
- Rangeland
- Sugarcane
- Reduced tillage and no-till corn
- Non-crop areas including golf courses, lawns, parks, rights-of-way
- Alfalfa fields
