

## Water-dispersable Supplement

# Vi-tal

Product Number: 148178

### Indications

To provide supplemental vitamins, electrolytes and trace minerals to aid in growth and productivity. Stimulates water consumption and maintains balance of body fluids in livestock and poultry.

### Directions for Use

Offer for 3 to 5 days - When receiving and placing poultry and livestock; to aid in alleviating stress due to scours, vaccination, castration, and debeaking; during temperature extremes; to stimulate appetite through improved nutrition (use the high or moderate level as outlined in the mixing directions).

Offer for 1 to 2 days - Before and after transportation (use the high level as outlined in the mixing directions).

Supplementation for 10 days or more - For aid in nutritional build-up, especially when feed intake is below normal (use the low level as outlined in the mixing directions).

Feed Supplementation - Thoroughly mix 2 packets per ton of complete feed. Use for 5 or more days.

### Warning

For animal use only. Not for human use. Keep out of reach of children.

### Storage

Store in a cool, dry place.

### Guaranteed Analysis

Salt (NaCl), not less than.....	45.0%
Salt (NaCl), not more than.....	50.0%
Sodium (Na), not less than.....	22.0%
Sodium (Na), not more than.....	26.0%
Potassium (K), not less than.....	10.0%
Magnesium (Mg), not less than .....	1.0%
Vitamin A, not less than.....	6,900,000 IU/lb
Vitamin D <sub>3</sub> , not less than .....	1,600,000 IU/lb
Vitamin E, not less than.....	2,100 IU/lb

### Mixing Directions

PREPARE FRESH SOLUTIONS DAILY.

- For high level supplementation: Mix 1 packet per 128 gallons of water.
- For moderate level supplementation: Mix 1 packet per 256 gallons of water.
- For low level supplementation: Mix 1 packet per 384 gallons of water.

*Note: For water proportions delivering 1 ounce of stock solution per gallon of drinking water, the high, moderate and low levels outlined above are for 1 packet per 1 gallon, 2 gallons and 3 gallons of stock solution, respectively.*

### Mixing Guide

For low usage (high level supplementation), mix:

- ¼ tsp per 1 gallon of water
- 1½ tsp per 5 gallons of water
- 2½ tsp per 10 gallons of water
